

Greenwood County Public Works

As Greenwood County residents begin the process of placing winter storm damage yard debris at the curb for pickup, some good post storm tips to remember:

1. Place limbs at the street no greater than 8 feet in length and 12 inches in diameter.
2. Lot clearing and professional tree removal debris shall be removed by the contractor, landscaping contractor, lawn care service, tree surgery company, property owner or person having the work done.
3. Avoid placing debris piles under utility lines, fire hydrants, utility boxes, mail boxes, storm drain culverts, and in the road.
4. Please do not mix leaves with limbs and other yard waste debris.
5. Leaves, pine needles, pine cones must be bagged.

Please contact Greenwood County Public Works at (864) 942-8662 to make a Yard Waste Collection Service Request.

Greenwood County residents should expect delays over the coming weeks as we expect larger than normal volumes of yard debris.
